

## The new LOGO! 9 Portfolio

Still: simple, connected and powerful –  
built for **Everyday Automation**

LOGO! 9 sets new standards in the field of small control systems. As requirements in simple automation solutions continue to grow, LOGO! 9 combines the computing power and security standards of larger systems with the familiar simplicity and cost-efficiency of a logic module – making applications future-proof.

### Why LOGO! is the right choice for **Everyday Automation**?

LOGO! 9 is the small controller for Everyday Automation – simple, connected and powerful. It offers more scope for growing requirements, facilitates operation and visualization directly on the device, makes engineering easier and more flexible, and is prepared for the latest security requirements.

More Power &  
Application Space

Modern Operating &
